DBIx::Cache

- "The definition of insanity is doing the same thing over and over and expecting different results" - Benjamin Franklin

- SELECT * FROM mytable;

- Query caching!

- What level?

- SELECTs only

DBIx::Cache

- Overload DBI. memcached/Varnish/etc.

- $sth = $dbh->prepare("SELECT ...");

- $count = $sth->execute();

- $row = $sth->fetch();

- Invalidation - DBI and Postgres

- Partials. Race conditions

- Drop in. Toggle on and off. Configurable. Less queries, connections. Faster apps.

- Status? planetpostgresql.org
